# Focused on ceramic expertise

RAK Ceramics is one of the largest ceramic brands in the world. Specializing in ceramic and gres porcelain wall and floor tiles, sanitaryware, faucets and tableware. The company has the capacity to produce 118 million square meters of tiles, 5.7 million pieces of sanitaryware, 36 million pieces of porcelain tableware and 2.6 million pieces of faucets per year at its 23 state-of-the-art plants across the United Arab Emirates, India, Bangladesh and Europe.

Founded in 1989 and headquartered in the United Arab Emirates, RAK Ceramics serves clients in more than 150 countries through a network of operational hubs in Middle East, Europe, Africa, Asia, North and South America and Australia. Across global operations the company employs approximately 12,000 staff from more than 40 nationalities. RAK Ceramics is a publicly listed company on the Abu Dhabi Securities Exchange in the United Arab Emirates and as a group has an annual turnover of approximately US\$1 billion.

# Forged in the mountains of Ras Al Khaimah

RAK Ceramics was established in Ras Al Khaimah in 1989 by H.H. Sheikh Saud Bin Saqr Al Qasimi, member of the Supreme Council and Ruler of Ras Al Khaimah, who aspired to have the best machinery with the latest technology to produce the best products possible for sale in the world.

Now under the vision and leadership of Sheikh Saqr Bin Saud Al Qasimi, Chairman of RAK Ceramics; the company has enjoyed rapid growth becoming an industry leader in just 30 years.

# Innovation and wide range

Innovation is the heart of RAK Ceramics philosophy and the company is a pioneer in introducing hi-tech innovations that are a breakthrough in the industry and a world leader in the production of ceramic and porcelain tiles ideal for use of indoor & outdoor spaces for wall and floor coverings for residential, retail and industrial projects.

A wide range of technologies are used at the state-of-the-art plants including big slabs pressing technology, advanced digital printing technology for industrial decoration & effects, translucent, double & triple charged feeding systems, digital soluble salts, thermal resistant glaze, slim, anti-microbial, glow in the dark, and other advanced technologies.

Re-use Quartz is our latest innovation and the world's most sustainable porcelain tile. Made from 100% pre-consumer recycled material, Re-use is a breakthrough collection of porcelain tiles. Each tile is a testament to our commitment to sustainability, as we repurpose materials from multiple ceramic production processes to create durable, eco-friendly tiling solutions. In our R&D laboratories, we continuously work towards improving the sustainability of our operations and focus on circularity through reduce, reuse and recycle of waste materials. Re-use Quartz is our latest innovation from these efforts. The tiles are manufactured from wastes generated in our production processes.

RAK Ceramics is known for the wide product and size range and for its ability to produce bespoke ranges for both small and large scale projects, enabling its clients to bring their idea to life.

# The world's leading ceramics lifestyle solution provider

RAK Ceramics helps architects and interior designers create icons and build marvels. It provides sustainable materials that inspire ideas, shapes and hues designed to freely express any style. Unique and inspiring products that realistically resemble natural materials, with unlimited choice.

RAK Ceramics gives porcelain perfection and limitless imagination. Our passion and expertise combined with a careful attention to detail enable us to provide designers and end users with a wide range of integrated ceramics solutions, allowing them freedom to be creative and plenty of room for imagination.

# Our quality makes us different

RAK Ceramics was the first company in United Arab Emirates being awarded with ISO 9001 certification by internationally recognized UK certification body “CICS” (Ceramic Research Institute Certification Scheme) for ceramics tiles and sanitarywares. Bureau Veritas Certifications verified the implementation of RAK Ceramics’ quality management system and certified the company in compliance with the requirements of ISO 9001:2015 with the scope covering the design, development, production and supply of ceramic and porcelain floor and wall tiles, slabs and vitreous china sanitarywares.

Bureau Veritas Certifications also certified RAK Ceramics for ISO 14001:2015 Environmental Management System and ISO 9001 for quality management system.

RAK Ceramics manufactures ceramic tiles according to the latest version of ISO 13006 and/or EN 1441 standards with equivalent ANSI A137.1 American national standard specifications for ceramic tiles.

Its Testing Laboratory is operating in accordance to ISO/ IEC 17025 accredited by NATA (National Association of Testing Authorities, Australia).

Being a corporate member of EGBC (Emirates Green Building Council), RAK Ceramics supports the promotion and development of sustainable buildings in the United Arab Emirates.

## ISO 27001

The information security management system (isms) that covers the Information technology operations, digital services and support services such as human resources, administration, sales and marketing Department In accordance with statement of applicability version 1.0 dated 15/11/21

# Sustainability at RAK Ceramics

At RAK Ceramics, our unwavering commitment drives us to make a meaningful impact on society, extending beyond manufacturing premium-quality products. We are dedicated to fostering a sustainable society by leveraging our expertise and resources for positive change. We are developing an ESG Strategy for 2024- 2030 that is aligned with international and industry agreements and initiatives, that will help us achieve sustainability leadership. The Strategy focuses on key areas - such as decarbonization, circularity, and workforce development - that will guide the continuous improvement of our business practices. The Strategy will be integrated across all our operations, and will be implemented through our Sustainability Governance.

We cultivate an environment that encourages imagination, curiosity, and innovation, enabling us to challenge norms and drive positive change within our industry and beyond. At RAK Ceramics, our commitment to creating a sustainable society permeates every aspect of our operations.

Based on latest global best practices and Global Reporting Initiative (GRI) Standards (2021) guidelines we publish ESG report annually . We continue to adhere to the United Nations Sustainable Development Goals (UN SDGs) and UAE National Strategies, such as UAE Net Zero 2050, UAE Climate Change Plan 2017-2050, and UAE Energy Strategy 2050.

Federico Sandri

Collaboration is the essence of creation. RAK Ceramics works with renowned designers to create innovative bathroom products that will inspire and enhance your imagination. Aimed to address the evolving design demand of the market, these collaborations bring forth creative ideas and latest trends in the industry resulting in an aesthetic and functional bathroom collection. RAK Ceramics brings the designer's idea to life by creating high quality products which gives the customers the freedom to imagine.

# Quality design for international tastes

RAK Ceramics product development has created a very wide range of products with carefully finished details and quality design to suit international tastes, incorporating the latest rimless technology. Carefully designed and engineered with the aid of the latest 3D CAD softwares and prototyped with 5 axis CNC machines, RAK Ceramics Sanitaryware range has the perfect solution for your bathroom, whatever you have imagined.

# Rimless technology

Water Saving

Easy Cleaning

Silent

Hygienic

No ledges or rim

Rimless

RAK Ceramics delivers the ultimate in technology for bathroom suites. Based on similar design specifications to sanitaryware in hospitals and medical centres, RAK Ceramics Rimless water closets allows you to experience the same high standards of hygiene in your own home. RAK Ceramics continues to set new standards of hygiene and water efficiency in the sanitaryware industry, with uniquely engineered water flushing systems that effectively remove waste, helping to keep bathrooms fresh and hygienic. **WATER SAVING** Using just 4 litres for the full flush and 2.5 litres for the half flush, water usage is reduced by a third. **HYGIENIC AND EASY TO CLEAN** The water closets have no rims to harbour germs, making cleaning quick, easy and more hygienic. **SILENT FLUSH** Rimless technology allows a faster and more silent flush. **EFFICIENT DESIGN** Design and efficiency can be successfully combined. Water flows vertically and horizontally, before flushing the entire inner surface of the bowl, without splashing.

# Spiralflush technology

## Noiseless and beautiful

Kludi delivers the latest design/technology combination for water closet flushing system.

Spiralflush allows you to experience the highest standard of design, hygiene and water efficiency, thanks to a uniquely engineered water flushing system, that effectively removes waste, helping keep bathroom fresh and hygienic. The system features a sleek linear design with minimal visible impact, while the spiral jet enables thorough cleaning using less water and markedly reduced noise. Water circulates in a spiral motion across the entire bowl surface, ensuring a splash-free and quiet operation.

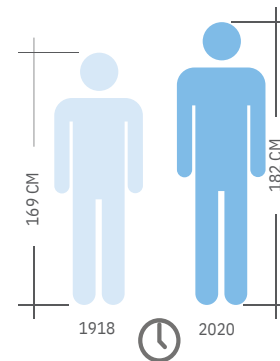

SP I R A L F L U S H

# Updated ergonomics

Over the last 100 years, the average height of people in industrialized nations has increased approximately by 10 cm.  
To be innovative in design also means meeting the changes in population and their new needs in terms of ergonomics and comfort. RAK Ceramics design evolves together with human evolution.
